

# Country Club<sup>®</sup> IV

Increased Visibility

Country Club IV is the latest, premium greens grade product line from LebanonTurf, the industry leader in premium golf course fertilizer products for over 70 years, that's specifically designed with a lighter granule color to help assist with easier, more accurate putting greens applications while providing superior turf quality and golf course playability. It features Meth-Ex<sup>®</sup> high-activity methylene urea nitrogen that delivers excellent color response and consistent, predictable long-term feeding. Country Club IV also contains immediately available, non-burning sulfate of potash which promotes root growth, encourages photosynthesis and elevates the turf plant's ability to handle environmental stress.
