**Emerald Isle  
Solutions™**

Emerald Isle Solutions™ True Foliar® nutrients incorporate seaplant extract, antioxidants, fulvic acids, and amino acids into a complete nutritional approach to turf health and vitality. Emerald Isle Solutions™ foliar-absorbed nutrients produce carbohydrate reserves and root mass even when seasonal stresses have compromised root health. No matter how tough the conditions, using Emerald Isle Solutions™ will increase the turf's ability to withstand stress, drought and disease.

## The Heart of CPR®

Seaplant extract is the major component of CPR®, the foundation of all Emerald Isle Solutions TrueFoliar® nutrition programs. CPR®, which stands for Color, Performance, and Roots, also contains a micronutrient package which includes three forms of chelated iron, magnesium, manganese, sulfur, and zinc. Because of its high concentration of seaplant extract and its unique micronutrient package, every tank-mix applied to any kind of turf will be enhanced by the addition of CPR®. CPR® should be at the heart of every turfgrass cultural program.

## PanaSea' Plus® 0-2-2 Liquefied Sea Plant Extract

PanaSea' Plus® is a blend of natural sea plant extracts harvested from the North Atlantic Ocean stabilized with a very small amount of phosphoric acid. Use as a foliar spray for maintaining golf course greens and tees, grass tennis courts, and athletic fields. Also ideal for high visibility lawns, parklands, roadways, landscape and horticulture applications.

## Nutri-Rational® TrueFoliar® Products

Emerald Isle Solutions Nutri-Rational® TrueFoliar® products offer advanced foliar nutrition with the following benefits:

- Absorbed through the leaf tissue
- Improved nutrient uptake
- Minimize potential leaching
- Controlled macro and micro nutrient application
- Does not bind with the soil
- Can be used when traditional fertilizer programs cannot
- No excessive shoot growth
- Benefits of seaplant extract
  - Increased photosynthesis and chlorophyll production
  - Better able to withstand stresses: heat, salt, and drought
